COMPANY RETURNS

All the figures in the foregoing pages are transcripts of the monthly returns as filed with the Inter-State Commerce Commission at Washington. Many railroad companies also issue monthly statements of their own, and the form of the returns in such cases is often different from that prescribed by the Commerce Commission. In some instances the figures in the two returns correspond, but the company statements go beyond the requirements of the Commission and give fixed charges and income from investments in addition to earnings and expenses.

It is our purpose that each issue of the "Railway Earnings Section" shall furnish an absolutely complete record of all monthly returns, in whatever form issued, that may be put out by any steam railroad in the United States. Accordingly, we bring together on this and the following two pages all the company statements where they differ in any way from the returns to the Commission, or where they embrace more facts than are contained in such returns. In these instances, of course, uniformity is lacking. Each company makes up its statement according to its own conception of what will serve best to convey a correct idea of the course of its income in the distinctive circumstances that may attend its operations or the character of its business. We in turn give the statements in the precise form furnished by the companies. Obviously, we cannot undertake to reconcile differences or discrepancies that may appear between the company figures and the Inter-State Commerce returns.

It should be distinctly understood that where the company statements are identical with those rendered to the Commerce Commission, we do not undertake to repeat them here. In such cases the reader must look for the figures among the detailed statements on preceding pages, which include every steam road that is obliged to make monthly returns to the Commission.

There is just one exception to the rule excluding statements that agree with those made to the Commerce Commission. Where the fiscal year of a company differs from that in the Commerce returns—that is, from July 1—we introduce the road here in order to present the figures for its own fiscal year.

BRIDGE BUILDING FOR STRESS OF HEAVY ROLLING STOCK.

For a long period to come it may safely be presumed that the foundries of the country will have a constant demand upon them for furnishing the railroads with a staple supply of heavier rail and structural bridge material. In recent years the reconstruction of the permanent way in regard to rails and bridges has scarcely kept pace with the rapid increase in weight of the rolling stock passing over it. Among the absolute necessities of the railroads for operating purposes large expenditures in this direction have been predicated by Mr. J. J. Hill and other railroad authorities. Some of the Western roads which are undergoing a process of rehabilitation, in order to compete with progressive rivals, have undertaken a thorough systematic rebuilding of the bridges along their trunk lines, and the next great development in railroad construction of the United States, it is now foretold, calling for steel material, will be in connection with the double-tracking of the trans-continental lines.

The original timber trestle bridges, where they still exist, are a survival of a by-gone era. Their first substitutes of iron or steel are in their turn doomed to give way to structures more able to bear the stress of the ponderous locomotives and long trains of gigantic freight cars that are now becoming standard rolling stock. Unless bridges are carefully strengthened or replaced with new structures, accidents are only too likely to occur, causing the roads greater expense than the precautionary outlay would entail.

Engineers, therefore, fully alive to the contingency, are discussing what are the reasonable limits of capacity bridges should be required to show corresponding to the increasing weights of trains. Important data in this connection have been compiled by the American Railway Engineering Association, which must be of great value in the consideration of all projects of railroad construction. The various railways use the Association's specification loading for bridge design generally, and the strength of a bridge is measured by the effect of the weight upon it of a consolidation type of engine of three series, in which the weight on each driving axle is 40,000, 50,000 or 60,000 lbs. In a table given in the Association's Bulletin on "Rolling Loads on Bridges," it is stated that one road has already gone so far as to consider that the highest of these specified loadings is insufficient to meet future conditions. Thirteen roads are content with the E-60 (60,000 lbs.) specification, fifteen others consider a loading of 55,000 lbs. sufficient, and ten others again think it unnecessary to go beyond the middle specification of the three.

How immensely the weight of a locomotive has increased may be judged from the fact that there are now in use engines of the 24-wheel articulated type, weighing 616,000 lbs. When the first bridge was built for carrying trains, about 1835, the four-wheel grasshopper type of engine weighed less than 22,000 lbs. It was 1873 before a consolidation type of locomotive on the Baltimore & Ohio Railroad reached the weight of 100,000 lbs., and 1905 before the maximum of 200,000 lbs. was reached. The increase to 463,000 lbs. has come within the last six years on the Baltimore & Ohio road, and it need hardly be said that neither rails nor bridges on that system have undergone such a revolution in that short space of time

Fortunately such a change was not necessary, inasmuch as the stresses produced on bridges are not in direct proportion to the weight of the heaviest engines. Thus the 24-wheel articulated engine, which weighs 174 per cent more than the usual specification E–50 class, produces only increased stresses varying from 15% to 33% in spans under 100 feet. For greater lengths the stresses will, in many cases, be less.

Bridge engineers of most companies seem to be fairly agreed that for ordinary practice the E-50 in the specification loading, accompanied by a 16,000 unit stress, will give a strength practically equal for all contingencies deserving to be considered. Some railroads with ready means at their disposal and able to make a capital outlay in the first instance of construction unfettered by the demands of rigid economy, may be able to indulge in the construction of heavier and stronger bridges than the E-50 class. But while these will doubtless in the long run bring an adequate return to the fortunate companies able to install them, the less wealthy railroads may reasonably content themselves with the less costly bridge, unless in particular circumstances.

If properly designed, bridges, as well as steel hopper cars, may be loaded considerably beyond their nominal capacity. Experience and numerous tests show that bridges, if carefully maintained in good condition, will safely withstand an overload of 50 per cent over that used in designing without traffic or speed restrictions. The bridge department of every well-operated road keeps a minute record of every bridge upon its system. Constant inspection should enable the chief bridge engineer to be able to trace the history of every member of a bridge structure and to note any signs of weakening or approach to the danger point when subjected to the heavier loads of the locomotives and long trains of freight, which there is an increasing tendency to operate over low-grade lines. With a careful regulation of speed a bridge will stand an occasional overload of 100%. The monster locomotives of the heaviest weight, like those constructed for the Santa Fe, the Northern Pacific, the Virginian, the Baltimore & Ohio, and the Chicago Burlington & Quincy railroads, are designed for heavy-grade sections of their systems, and it does not follow that the type of regular road engine will be displaced, especially as it is the aim of the older railway systems to reduce their grades wherever possible.

Moreover, the indefinite increase in size and weight of locomotives and cars must mean eventually the complete reconstruction of a line from the roadbed upwards. Greater clearances in tunnels and bridges, a wider guage of track, and, practically, the reconstruction of the railway to suit the new standards, would be required, so that commercial considerations would alone set limitations to the ability of the engineer to build such rolling stock of excessive size. For these reasons Mr. J. E. Greiner, who has recently dealt with the subject, comes to the conclusion that the E-50 specification type of bridge is sufficient for all reasonable purposes. It provides, in his judgment, for increased loading above the heaviest now in service to a sufficient extent to warrant its continued use by the railways which consider it a proper standard on all divisions until such time as conditions require practically a complete reconstruction of the lines.

INCREASED TRAIN MOVEMENT THROUGH CUT-OFFS AND GRADE REDUCTION.

Striking instances of the "cut-off" in railroad construction recently completed or about to be undertaken display the increasing influence of the operating engineer's efforts to reduce the cost of transportation. In reaching out for a share in the expanded volume of great traffic confidently expected to be developed in the coming years proportionately to the output of the country's resources of raw material and manufactures, railroad officials in every section are devoting particular attention to the all-important considerations of the physical betterment of the roadway for the provision of additional facilities.

It may be noticed in the application for new funds made by the financial departments of the companies how large a proportion of the money sought is destined for employment on the multiplication of tracks, the reduction of grades and the elimination of existing curves. The necessity of economy imposed upon the railroads in the last four or five years has induced caution among the railway chiefs in executing far-reaching ambitious schemes. Such achievements as the cut-off across Salt Lake, the Key West extension of the Florida East Coast Railway and even the Scranton Division improvement of the Delaware Lackawanna & Western Railroad may be held to be exceptional in character and hardly typical of the ordinary railroad, which is more obliged to cut its coat according to its cloth. There are, however, so many examples of the general practice all over the country as to make it evident that the minor systems, as far as their means allow, are carrying out the principles underlying the "cut-off" and the reduced grade.

On the older systems of the Eastern States, notably in the case of the Baltimore & Ohio, the half-yearly returns exhibit an improvement in the movement of freight that may justifiably be ascribed to the greater speed and efficiency of operation made possible by such alterations of trackage. It is more and more realized how closely the physical character of the road is reflected in net earning power. A railway that is run down in point of its maintenance of way and construction, and is unable to cope with the heavier train loads, is almost hopelessly handicapped in competition, and needs rehabilitation just so far as it has fallen out of the line of progress. Surveyors and engineers of new Western roads have accomplished great feats and set fresh standards. The Grand Trunk Pacific Railway, after long search in surveys, crosses the Rockies by the Yellow Head Pass, at an altitude of 3,723 feet, the highest point touched by the line between the Atlantic and the Pacific. In the course of a thousand miles of the Grand Trunk, which include the passage of the Rocky and Cascade mountain ranges, there is no heavier ruling grade than 0.4 per cent (21.12 feet per mile), either against west or east-bound traffic. This grading compares most favorably with that of other trancontinental lines, and, it may be assumed, has influenced the Canadian Pacific in some degree in deciding to construct another route across the Rockies to Vancouver, so as to avoid the higher gradient of its present line.

Out of the new construction made last year in the United States, the longest single stretch of line reported was that of the Chicago & North Western, which included a cut-off of 130 miles between Lindwurm, Wis., and Necedah. An important cut-off on the Santa Fe was that between Texico, N. M., and Coleman, Tex. To obtain the advantage of speed, both in freight and passenger train operation, the example of the Delaware Lackawanna & Western Rail-

road illustrates in particular the aim of the operating engineer with the means to back it. The company, already possessing the shortest route between New York and Buffalo, has with its cut-off lessened appreciably the time of its fastest train between the two points. It has decreased the length of road by only eleven miles, but this saving in distance is supplemented by the easier character of the track compared with the old line. In the new section the ruling gradient, though the line is carried through mountainous country, is 0.55, while there are only fifteen curves as against 57 on the old section, the place of which it takes when speed is the chief object. This improvement required long cuts through solid rock, a fill across a valley which makes one of the longest and highest embankments known in roadbed construction and a remarkably long concrete viaduct. These features entailed an expense at some points of $421,000 per mile, but the outlay is expected in the long run to be warranted. In the case of the Florida extension, the peculiar construction of 81 miles of embankment, with stretches of viaduct of solid concrete six miles in length along the shore waters, cost as much as $900,000 per mile, to be recouped, it is hoped, by the development of traffic moving towards Cuba and Panama.

Other lines are steadily pursuing the policy of completing a second track throughout their whole system. The Wabash, as an indication of its new energies and funds, is proceeding to carry out plans designed some years ago, and will lay 180 miles of new second track from Lodge, Ill., to St. Louis, Mo., leaving only 116 miles of single track on the Chicago-St. Louis lines. Provision has also been made in the forthcoming expenditures for grade reduction and line revision, and the new rails to be used will be brought up to the standard of the 100-lb. rail to receive the heaviest traffic.

By the resolute adoption of a similar policy the Erie has already put itself in a better position for coping with the conveyance of the multifarious commodities produced in its wide territory. It has been fully recognized that for the economical handling of freight, in view of the heavier traffic coming forward, only low-grade lines can satisfactorily meet the requirement of shippers. The occurrence of steep grades means almost inevitable delays. Freight trains filled with perishable food and other merchandise are held up by the slow movement of the long trains carrying coal and other heavy coarse freight. The express freight train, to match the express passenger train, is almost an impossibility without the additional trackage provided for the slow-moving mineral trains of 60 to 80 cars, of an average capacity of 50 tons per car. The completion of a four-track line throughout the New York Division of the Erie, now under construction, must sensibly relieve the congestion which frequently arises. A glance at the profile of the Erie's Cincinnati Division between Marion, Ohio, and Kent, shows it to be particularly of a saw-tooth description in its 112 miles, and rival systems derive advantage from being able to accept freight for through carriage by reason of their speedier operation on roads of less arduous grades. The whole of the division has now almost been double-tracked. Grades have been here and there reduced. Where bridges have been enlarged heavier girders and trusses have been used. On the four main construction improvements carried out in the last six years the road has been modernized by the use of heavier ballast, ties, rails and bridges. Concrete is being used, wherever possible, for culverts and bridges. The fruits of the solid reconstruction are now happily being reaped, especially in the sections immediately under consideration, viz., the Erie & Jersey Railroad in Orange County, New York, 40 miles; the Genessee River Railroad from Hornell to Cuba, New York, 32 miles; the Columbus & Erie, west of Jamestown. Previous high grades along the main line have been cut down. Heavier power has been provided concurrently in the thirty-five locomotives ordered for the Cincinnati Division. To suit the conditions it was decided that the Mikado type would be most practical. Designed to haul 1,450 tons west-bound and 1,520 tons eastbound these locomotives can deal with about 38% increased tonnage, compared with the consolidation engines whose place they take, while they can haul the freight at a correspondingly higher speed.

NEGLIGENCE IN RAILWAY ACCIDENTS.

The lamentable railway disasters at Odessa, Minn., on the Chicago Milwaukee & St. Paul RR. and on the Illinois Central at Kinmundy, Ill., were found to be due to the element of human carelessness, which, it must be regretfully admitted, can never be wholly eliminated in the efforts made to reduce railway accidents. In both these rear-end collisions the occupants of sleeping cars were the principal victims. At Odessa ten persons were killed and eighteen injured, and the evidence reported by the Railroad & Warehouse Commission of Minnesota proved that the collision resulted from violation by the employees of the rules of the company. This accident took place on a section of railroad operated under the rules of the manual block system. The block section at this point happens to be the longest of the Milwaukee road. Demand for rapid service and the large amount of traffic interfered with the keeping of trains twenty miles apart, and employees, in order to maintain schedule time, were in the habit of "taking a chance," men in authority winking at violations of the rules. The dispatcher, the switch operator and the conductor of the second train, it seems, knew that they were thus violating the rules, and the Commission came to the conclusion that a number of the employees were guilty of gross negligence and recommended such action as would ensure the indictment and speedy trial of the responsible parties.

In the Kinmundy case the block system was not in use, but the habit of similar gross carelessness in disgarding the rules for ordinary precautions under the time-interval system used by the Illinois Central seems to have been no less prevalent. The conductor, flagman and engineman were all negligent. According to the report of the investigators, the regular time interval between trains on this portion of the line is ten minutes. The New Orleans express, more than half an hour late, had stopped at Kinmundy to take water; the Panama Limited, running behind it at its regular rate of speed, crashed into the rear car, which happened to be the business car of F. O. Melcher, Second Vice-President of the Rock Island lines. Mr. Melcher and three companions, including former President J. T. Harahan of the Illinois Central, traveling to Memphis in connection with the Rock Island plans for building new terminals and a bridge across the Mississippi, were instantly killed. The investiga-

tion board appointed by the Illinois Central elicited testimony to the effect that, though the rules of the company were clear and definite, and had been duly impressed upon the employees by systematic instruction and repeated efficiency tests, they had been practically slighted. The crew of the first train was provided with both caution and stop fusees, neither of which were used either to space or to stop the following train, though the flagman and baggagemen all testified that it would have been easy for them to have used a fusee for the protection of their own train. It was found by the board of inquiry that the flagman and conductor of the first train and the engineer of the second were all to blame for the collision.

In the partial list of train accidents in December published in the newspapers, out of the 40 accidents enumerated there were 55 persons killed and 22 injured. Of the 17 collisions, 8 were rear collisions, 5 butting collisions and 4 of a different kind. In the derailments 5 were attributed to broken rails and a broken frog, 3 to defective track, 2 to runaways on steep grades, 1 to a boiler explosion, 3 to rock or accidental obstruction, 1 to negligence and 8 were unexplained. With the exception of the Odessa collision, the Great Northern disaster at Sharon was the worst, a broken rail being the cause of 6 deaths and injuries to 13 people on a passenger train. Broken rails have likewise been blamed for some bad accidents during the present month, and other serious calamities apparently have been barely averted by timely discovery. One notable instance was reported in which a little girl, noticing a faulty rail, hurried some distance along the track and was able to stop the express which she knew to be due.

The appalling loss of life spread over so many systems warrants the demand that there should be no slackening in the efforts of railway officials generally to reduce to the utmost of their power these risks in travel upon the railroads of the country. When such valuable lives of railroad men themselves are sacrificed through negligence, as was the case at Kinmundy, it invests the disaster with the effect of a tragedy to know that the locality of the Kinmundy accident is only 17 miles from a point on the Illinois Central to which an installation of the automatic block signals had already been authorized. The experience and wise judgement of such men as Mr. Melcher and Mr. Pierce were never more needed in the higher counsels of railroad men than in the present critical period. Mr. Melcher's services in the chairmanship of the Special Committee on the Relations of Railway Operation had won him a well-deserved reputation. He was still an active member of the committee, and enjoying the confidence of all parties by his broad views regarding the regulation of railways, he was admirably qualified to be a negotiator and mediator between the railroads, the railway commissions, the lawmakers and the railway workmen's brotherhoods. Mr. Pierce, the General Solicitor of the Rock Island, was one of the best authorities on the body of railway law that has grown up under the Act to Regulate Commerce, as interpreted by the Inter-State Commerce Commission. Both as a traffic expert and as a railway lawyer, he held a place it will be hard to fill.

The fate of these men, corresponding so closely to that of Samuel Spencer, President of the Southern Railway, in 1906, may serve, like Huskisson's memorable death at the opening of the railroad era in England, to focus attention upon the imperative need of striving to the utmost to safeguard life upon the railways. Certainly, the present instance emphasizes the recommendations of the Block Signal and Train Control Board made in its fourth annual report. The Board says it can only repeat its former conclusion as to the proved superiority of the block system over the time interval or dispatching system of train operation. It is greatly to be regretted, says the Board, that the extension of the block system has proceeded so slowly. During the last year the increase in block-signaled mileage was practically all upon roads that already had the block system in use. The length of railways worked by the block system in the United States, according to the "Railway Age Gazette," is now something over 73,000 miles. Of this about 20,000 miles are controlled by automatic signals and 53,000 are operated under the manual system. The Block Signal Board notes that the extension of the block system to new roads—that is, to roads which had not before used the space-interval method of train operation—was not such as to warrant the belief that the block system will be brought into use generally within any reasonable period of time without Governmental action compelling it. Three of the four members of the Board express the opinion that "with respect to the matter of safety, the time has come in this country to inaugurate a system of supervision over inter-State roads somewhat similar in character to that now administered through the British Board of Trade."

The fourth member of the Block Signal Board is not prepared to go so far as his colleagues. But in his minority report, while he doubts whether such Governmental regulation is suited to this country, with its 240,000 miles of railway and railway operations carried on by 1,500,000 men in 3,000,000 square miles of territory, he is at one with them in recommending the practice of publicity. He, too, considers that "a very reasonable and safe, yet progressive, course for our Government to take in the matter of railway safety legislation would be to enact the proposed law making the use of the block system compulsory. To require this use is simply the making of the best practice the general practice."

RAILROAD AND INDUSTRIAL DIVIDENDS FOR TEN YEARS.

The following is a record of the dividends paid in the last ten years on the stocks of the more important railroad and industrial corporations throughout the country. Dividends actually paid form the basis of a year's total. Those declared in one year and paid in another year appear in the latter year. The record of the industrial corporations is given in a group by itself, at the end of the tabulations.

FOR MISCELLANEOUS COMPANIES, SEE PAGES 146 TO 185, INCLUSIVE

EXPLANATORY.—This Supplement is expressly intended for use in connection with the investment news and official reports published from week to week in the "Chronicle." Frequent reference is therefore made to the volume and page of the "Chronicle" (as V. 88, p. 000), where fuller information may be found. Following also each statement is given a reference to the latest news item in the "Chronicle" respecting the company. As every such item contains a reference to the last preceding item, the reader can run back over the company's history at pleasure. Annual reports are in black-faced figures.

Index.—Any company not in regular alphabetical order may be found by means of the index, on another page, to roads leased and consolidated.

Dividends.—The *dividends* tabulated in the text are those actually *paid* during the calendar years named, irrespective of when *earned;* "divs." is frequently abbreviated "div."

Securities.—These are described in table at head of page (except the stock, for lack of space, sometimes only in text below) as follows:

Net Earnings are given after deducting operating expenses and frequently taxes, but not interest, rentals or other fixed charges.

Miles of Road.—Opposite bonds, this means the miles of road owned covered by the mortgage.

Size or Par Value.—Shows (in dollars unless otherwise marked), the denominations or par value, "100, &c.," signifying $100 and larger.

Rate Per Cent.—The interest and dividend rate *per annum* is here shown: g, gold; cur, currency, x, extra; s, stock or scrip.

When Payable.—J & J stands for January and July; F & A, February and August; M & S, March and September; A & O, April and October; M & N, May and November; J & D, June and December; Q-J, quarterly from January; Q-F, quarterly from February; Q-M, quarterly from March.

Bonds, Principal When Due, &c.—This column shows the date when the bonds mature and the amount and date of the *last* dividend.

Abbreviations in table: M for "mortgage"; gen M for "general mortgage"; con M or consol M for "consolidated mortgage"; inc M for "income mortgage" g for "gold"; c or cur for "currency"; guar p & i for "guaranteed principal and interest"; cum for "cumulative"; non-cum for "non-cumulative"; conv for "convertible into stock at holder's option"; pref for "preferred"; pref p & d "preferred as to principal and dividends; s f for "sinking fund"; l gr for "land grant"; r "fully registered (no coupons)"; c "coupon"; c* "coupon, but may be registered as to principal"; r* "registered, convertible into coupon bonds"; br "branch"; end "endorsed"; red, "redeemable"; dr'n or drawn, "subject to call when drawn by lot"; p m, "per mile"; as'd; "assumed"; x, "payable without deduction for any tax."

BONDS.—In April 1909 the holders of bonds of various issues (marked "x" above) were offered the option of exchange for general mortgage 4% bonds on certain terms. V. 88, p. 1060, 1127, 1559; V. 89, p. 40, 720, 1141. The general mortgage bonds ($300,000,000 auth. issue, interest not to exceed 5%) are a first lien on about 3,401 miles of road, and on retirement of the outstanding underlying bonds, for which bonds are reserved as below noted, will be a first lien on the entire mileage owned, aggregating 8,599 miles. The generals have been issued or are issuable as follows (see V. 86, p. 1342, 1466; V. 88, p. 504, 685; V. 92, p. 525):

Reserved to retire outstanding bonds of previous issues aggregating $167,565,000 (of which $17,428,300 were held in various sinking funds)	$177,000,000
Issuable for reimbursing the treasury for outlays already made by it for betterments and additions ($22,000,000 sold)	45,000,000
Issuable for additions, improvements and betterments of and to the mortgaged property (of which $13,724,000 sold)	78,000,000

In Jan. 1909 $20,000,000 general 4s were sold, of which $13,724,000 were used to purchase $23,657,000 Colorado & Southern common stock, and in Feb. 1911, $8,000,000. V. 88, p. 685; V. 92, p. 525.

The *Iowa Division* bonds are a first mtge. on the main line in Iowa from Burlington to East Plattsmouth, on the Missouri River, 272 miles, and on 621 miles of branches and 86 miles of second track. These bonds have a sinking fund of 1½% ($203,800) yearly, for which the 4s are subject to call at 100 and the 5s at 105. The single main line and branches covered "shall not exceed in the aggregate 900 miles," at $16,000 per mile; on second track additional $14,000 per mile. V. 65, p. 462.

The *Nebraska Extension* bonds of 1887 are issued at $20,000 per mile for single and $10,000 per mile for second track on not exceeding 1,500 miles. Now a direct first lien. Abstract of deed, V. 45, p. 441; V. 85, p. 721.

Burlington & Missouri RR. in Nebraska consol. mtge. of 1878 is now a 1st M. or 1st coll. lien; they are subject to call for the sink. fund at par.

HISTORY, LEASES, &c.—In August 1902 the St. Louis & San Fran. acquired the greater part of the stock, as said below. Stockholders voted July 19 1911 to merge the Evansville & Terre Haute, theretofore controlled. See STOCK below.

The Chicago & East. Ill. owns $1,000,000 stock of Chic. & Western Ind. Special lease of Chicago freight terminals, V. 78, p. 819.

STOCK.—Com. stock outstanding was $7,217,800 ($15,000 p. m.); pref., $8,830,700. In addition, $6,408,300 com. and $161,300 pref. were held in trust by Trust Co. of America in July 1911 as a part of "trust assets" under agreement dated July 1 1905, for improvements, acquisitions or refunding, to be terminated on satisfaction of the St. L. & S. F. stock trust agreements below referred to. V. 85, p. 1001.

Stockholders voted July 19 to increase the authorized preferred stock to $15,000,000, to merge the Evansville & Terre Haute and Evansville Belt, the E. & T. H. common to receive 83 1-3% in C. & E. I. preferred and the Evansville Belt stock par, calling for $3,216,100 pref. and increasing total amount of pref. issued to $12,046,800 (the E. & T. pref. to have the option until Jan. 1 1912 to take E. & T. H. refunding bonds in exchange at par); remainder reserved for new mileage at $10,000 per mile. V. 92, p. 1374, 1435; V. 93, p. 229, 588.

The St. Louis & San Francisco RR. has given in exchange for the common and pref. stock its stock trust certificates at the rate of $100 thereof for each $100 share. V. 75, p. 289. All of the $7,217,800 common, and in Feb. 1912 $6,479,600 of the $12,046,800 pref. then outstanding, had been exchanged on this basis. The St. L. & S. F. has the option to retire the trust certs. at any time at $250 per $100 com. stock trust certificate and $150 per $100 pref. stock trust certificate, payable in gold, and obligates itself to pay off entire issue in 40 years from July 1 1902 at same rates, meanwhile obligating itself to pay 10% dividends on the com. and 6% on the pref. trust certificates, respectively, these amounts being equivalent to 4% on the principal sum to be eventually received in payment therefor. Upon failure to pay any dividend within 30 days after demand therefor, any holder may surrender the certificates to the trustee and receive the shares represented thereby. V. 75, p. 289, 393, 1031; V. 82, p. 48. A majority of common stock trust certificates were in 1905 exchanged for certificates in denominations of $1,000 each, representing 4 shares of common stock, bearing 4% int., and payable in 1942 at face value. See form, V. 80, p. 1856.

PLAN.—The plan of the above committee, declared operative Oct. 26 1909, provides that a new co. shall acquire the road after foreclosure, subject to the $2,000,000 prior lien mortgage of 1900. The committee is given power to sell in the common interest.

The plan (V. 89, p. 285) authorizes an issue of $15,000,000 "general and refunding" 30-year gold 4½s. Present issue, $2,850,000, of which the $1,100,000 issuable in exchange for the old consols and unpaid coupons are to bear only 3% interest for the first 6 years. For six years the new bonds are to be subject to call at par on any int. date on 60 days' notice; thereafter at 107½. Of the bonds, $2,000,000 will be reserved to refund prior lien bonds and $150,000 for use to aid in refunding, and $10,000,000 for extensions, &c.

Out of the $2,850,000 "general & refunding" 4½s, $850,000 will be placed in the treasury, and it is estimated that after providing for the floating debt the new company will have free treasury assets in cash and "general and refunding mortgage" bonds of over $1,000,000 to make needed improvements.

The new company will have a fixed annual charge of about $154,000 for the first 6 years, which will be thereafter increased about $15,000 by the increase in rate from 3% to 4½% on the new bonds exchanged for old cons.

Security-holders who prefer not to make a cash payment as above provided are offered in new stock at face value voting trust certificates for $1,000 income mtge. bonds, $60 in new stock; for $100 pref. stock, $4 in new stock; for $100 common stock, $2 in new stock.

HISTORY.—On Dec. 1 1895 succeeded, per plan in V. 61, p. 368, the N. Y. Lake Erie & Western RR. Co., sold in foreclosure under its second consolidated mtge. The company holds in fee or through ownership of all or practically all the stock of the independent companies the line from New York to Chicago (including the Nypano RR. and Chic. & Erie companies), and also all subsidiary lines except a few small properties.

COAL AND STEAMBOAT PROPERTY.—The *Erie* coal properties represent an aggregate of 12,400 acres of anthracite, of which about 9,000 acres are held in fee; also 53,000 acres of bituminous coal lands held in fee, 14,000 acres of bituminous held under mineral rights. Its coal and coke tonnage in the year 1910-11 aggregated 19,478,808 out of the 37,570,662 tons hauled. The Union Steamboat Line (merged in Erie RR. Co. June 30 1896) has terminal, &c., properties in Buffalo and 8 lake steamers. See V. 63, p. 514. The *Penn.* coal properties acquired in 1901 are additional. V. 82, p. 1322.

STOCK.—The voting trust was dissolved May 1 1904. V. 78, p. 1549. The prior lien and the general lien bonds of 1895 have 10 votes for each $1,000 of principal, their authorized issues aggregating $175,000,000, of which $83,724,000 issued to July 1911. Provisions of preferred stock were in "Supplement" of April 1897, page 3. V. 66, p. 335, 573.

BONDS.—The new first consolidated mtge. is for $175,000,000 (Farmers' Loan & Trust Co., trustee)—see **abstract** of deed, V. 62, p. 89, and secures $35,000,000 prior lien and $140,000,000 general lien bonds. Both series have voting power; see "Stock" above.

Of the $140,000,000 *general lien bonds*, $92,668,000 were reserved for the ultimate acquisition of bonds and guaranteed stocks left undisturbed on various parts of the system (see list, V. 62, p. 89), and $17,000,000 were reserved for new construction, betterments, additions, &c., after 1897—not over $1,000,000 to be used in any one year. In July 1911 $35,885,000 general lien bonds were in hands of public, $12,839,000 additional being deposited under collateral trust notes—see below.

The position of the first consolidated mortgage is substantially as follows: It is a first lien (mortgage or collateral, the prior lien bonds, however, preceding the general lien bonds) upon the company's chief coal properties (except Penn. Coal Co.) upon its water transportation lines (including valuable terminal properties appurtenant thereto), and upon a number of profitable local lines in New Jersey and near Buffalo; it is a *second lien* upon certain minor coal properties and upon the railroads leading to all the coal properties, upon the terminals at Jersey City, upon the Buffalo N. Y. & Erie RR. (the main line to Buffalo), and the Buffalo terminal properties other than those upon which it is a first lien, and upon the entire line from Salamanca to Chicago; it is a *second consolidated mortgage* upon the lines between Piermont and Dunkirk (447 miles).

The collateral trust 4s of 1901 are secured by 51% of the entire N. Y Susq. & Western stock ($26,000,000 total issue), all of the Pennsylvania Coal Co. stock, and the stock of the Erie & Wyoming Valley RR., Scranton, Pa., to Lackawaxen, 65 miles, and Delaware Valley & Kingston RR. A sink. fd. of 10c. per ton of coal mined purchases bonds at not exceeding 105; otherwise to be applied to the drawing of bonds by lot; all such bonds to be kept alive and the accruing int. thereon to be added to the sinking fund, which, it is estimated, will be sufficient to retire the whole issue at or before maturity. V. 71, p. 1219, 1311; V. 72, p. 44, and circular, p. 136, 532, 257; V. 79, p. 212. In 1901-11 $4,525,000, included above as outstanding, was purchased by the sinking fund.

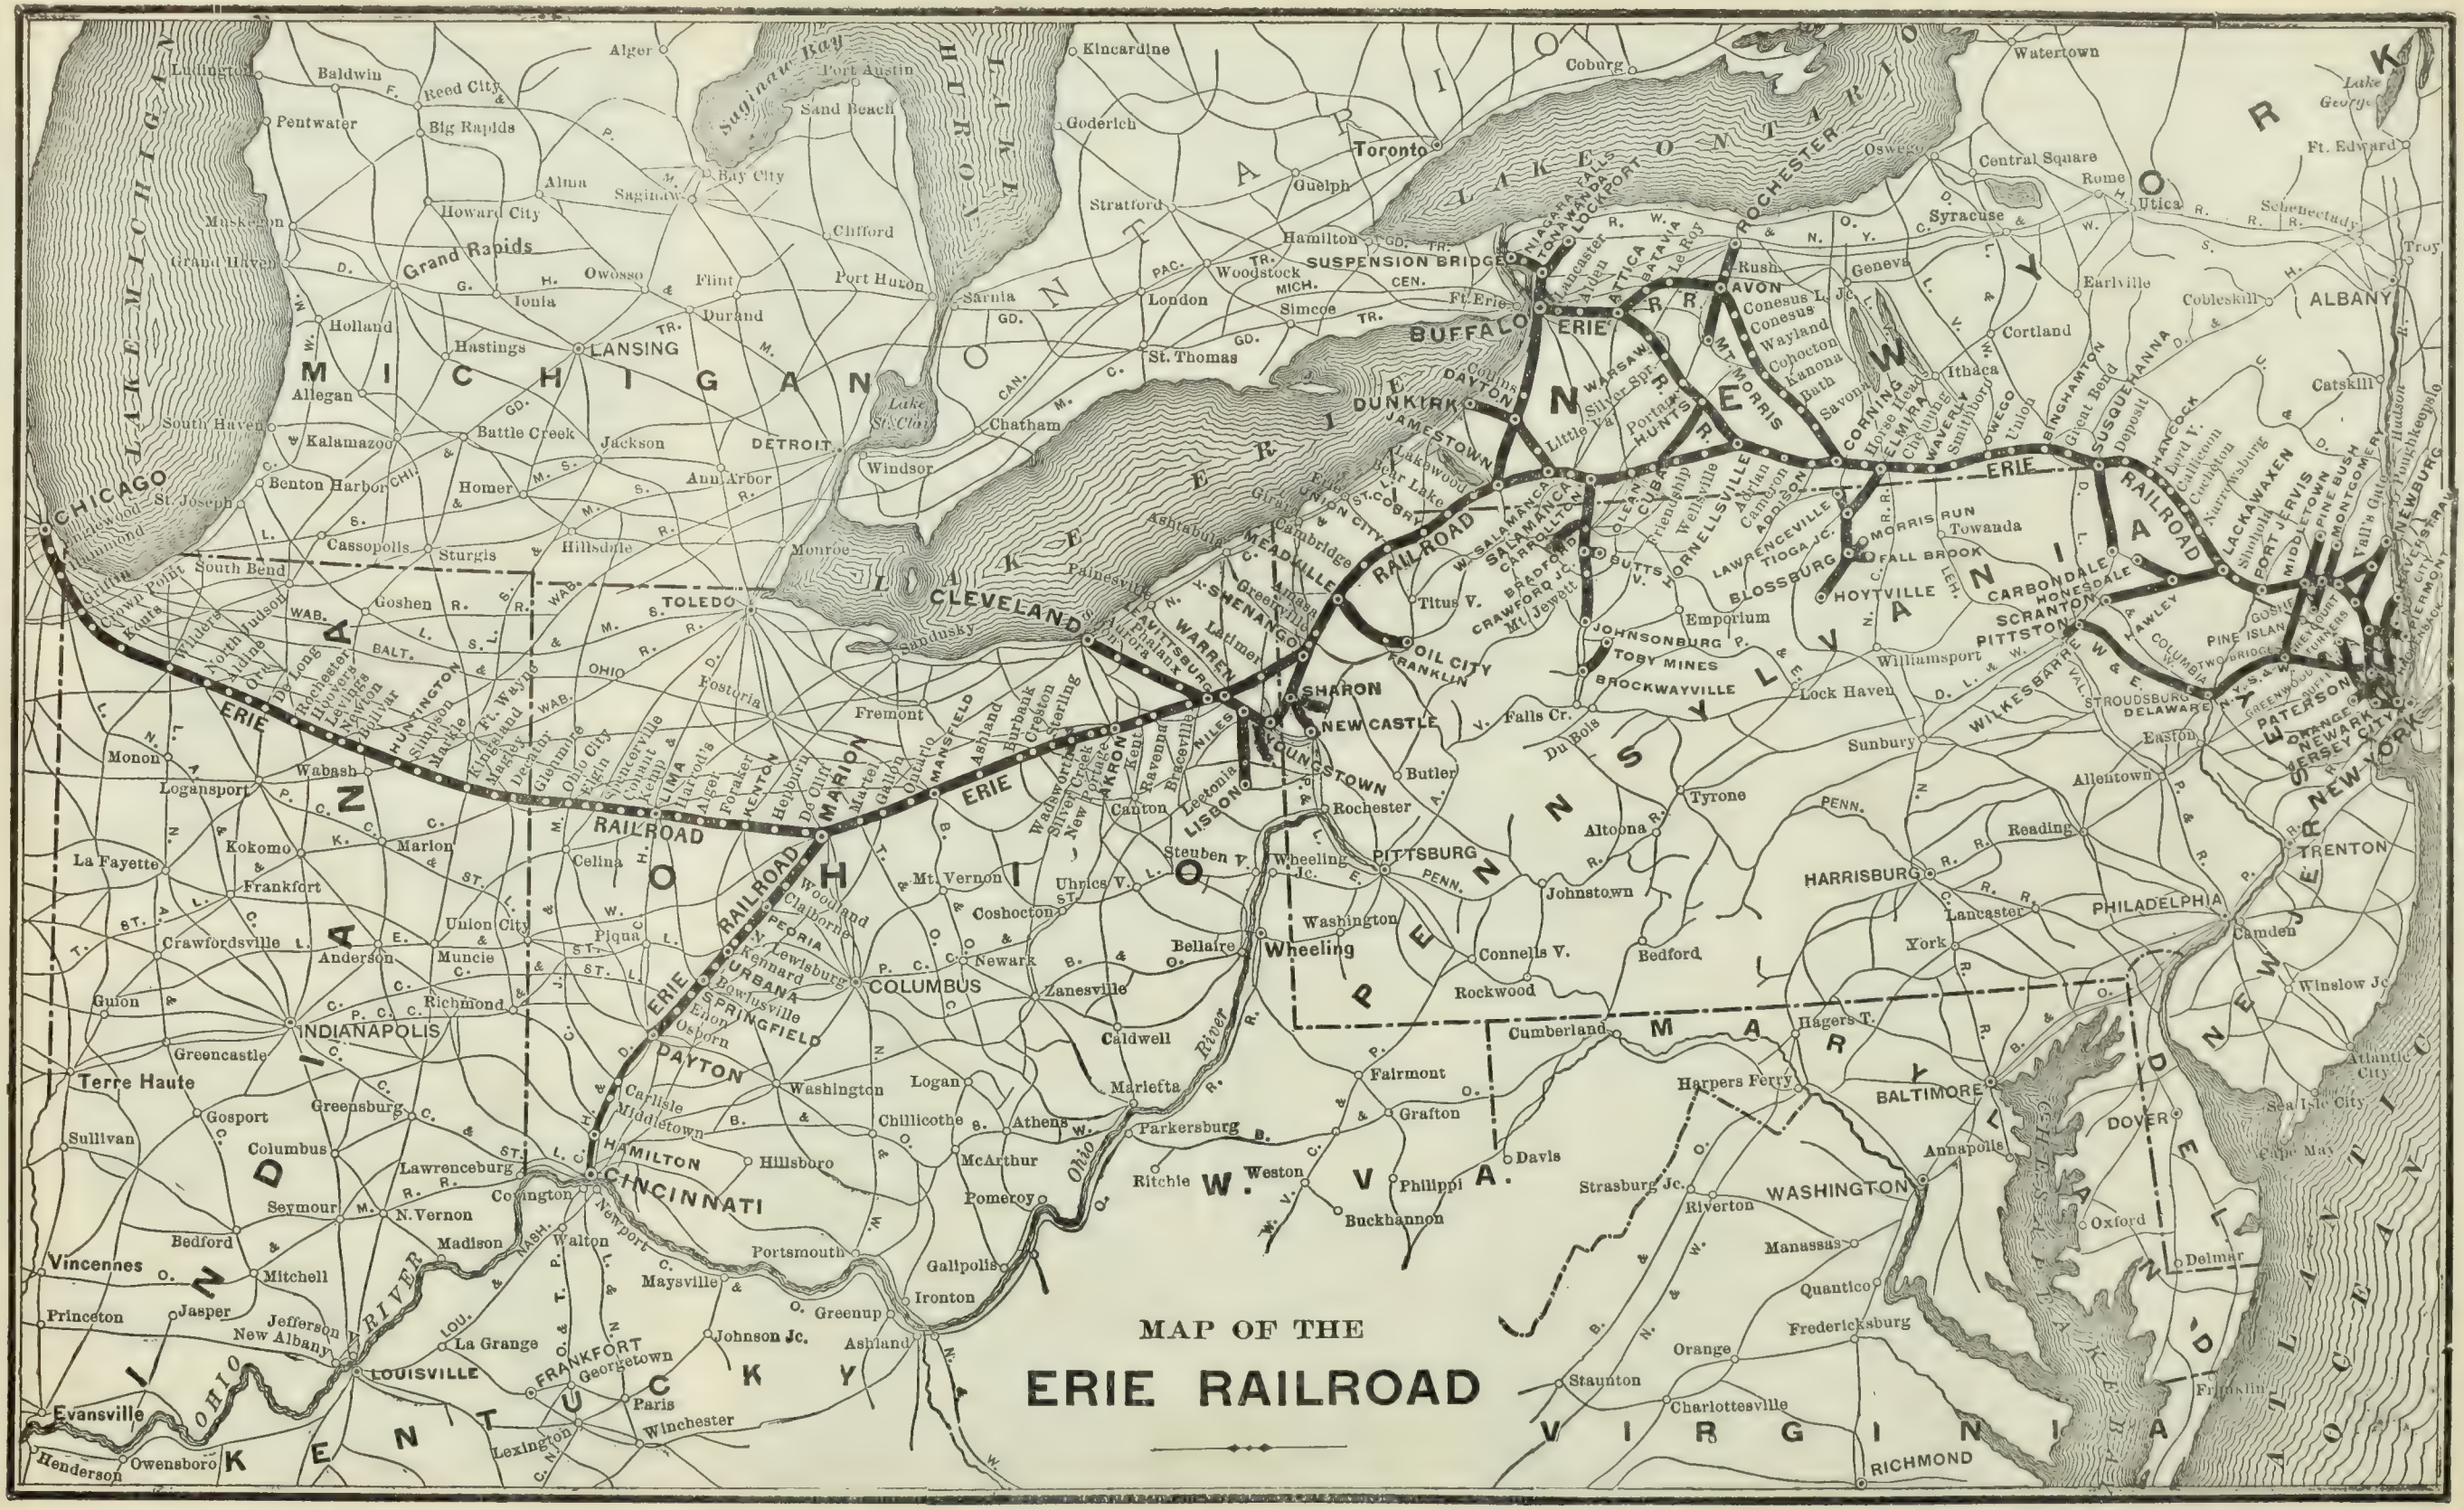
The conv. 4s of 1903 ($50,000,000 authorized issue) will be issued from time to time as required and may be made convertible into com. stock at a price to be fixed when the bonds are issued, but not less than $41⅔ per share; they will cover all the company's property subject to underlying liens. The first $10,000,000 (series A) issued for improvements and equipment is convertible on basis of $100 bonds for $200 stock to April 1 1915.

Series B bonds for $12,000,000 are convertible into common stock at $60 per share at any time since Oct. 1 1907 and before Oct. 1 1917. V. 76, p. 382, 541; V. 78, p. 768; V. 79, p. 2205; V. 84, p. 270.

The Erie & Jersey RR., with $600,000 auth. stock, completed in Jan. 1909 a low-grade cut-off from Highland Mills via Campbell Hall to Guymard, N. Y., about 40 miles. In Oct. 1911 $4,550,000 3-year 5% notes were sold, secured by $4,000,000 E. & J. bonds (auth. issue $10,000,000 1st 50-year 4s) and $3,000,000 Genesee River 1st M. 4s to retire the $3,000,000 extended Erie & Jersey notes due Dec. 1 1911 and maturing notes of Genesee River RR. V. 93, p. 940, 1022.

In June 1907 the Genesee River RR. was authorized to make $6,000,000 mtge. covering road from Hunts to Cuba, N. Y., 32.9 miles, completed Oct. 1910. See paragraph next above. V. 84, p. 1366, 1488; V. 81, p. 777.

The $12,500,000 6% collateral notes dated April 8 1911 were issued to retire the remainder of the notes of 1908 then maturing (see "Ry. & Ind. Sec." for Jan. 1911). They are secured by deposit of $12,839,000 Erie "general lien" bonds (additional to the amount shown above as outstanding); $985,000 Erie convertible bonds, series "B," $336,000 Erie RR. Pennsylvania collateral bonds, $217,000 Chic. & West Ind. consol. 4s, $95,000 Mutual Terminal Co. of Buffalo 4% notes, $6,306,000 N. Y. Susq. & West. pref. stock, $163,100 Lehigh & Hudson Riv. Ry. stock and $145,700 Temple Iron Co. stock. V. 92, p. 594.



In Feb. 1912 it was reported that the company will shortly sell about $10,000,000 two or three-year 5% notes. V. 94, p. 487.

Car Trust Series, Gold (*Denomination* $1,000 *each*). *See V.* 88, p. 882.

FINANCES.—During the year ending July 1 1909 maturing coupons to a total of about $6,000,000 were purchased on behalf of the company by J. P. Morgan & Co. in order to place the road in position to complete needed improvements and additions. The coupons so purchased were pledged with other collateral to secure about $14,000,000 of 6% notes due April 8 1911. These notes were paid at maturity in 1911 and $12,500,000 new 6% notes were issued (see "Bonds" above), without the coupons, as part collateral. The financial plan as originally contemplated in 1908 called for the creation of a large car trust and the issuance of $30,000,000 bonds to take up the first-named note issue and to fund coupons maturing on the prior lien bonds and general lien bonds during the five years ending June 30 1914. V. 89, p. 1086; V. 87, p. 1245; V. 88, p. 504, 853, 882, 1061, 1127. In Oct. 1911 sold $4,550,000 5% notes to retire maturing obligations. See above.

STOCK.—Authorized, $45,000,000 (par of shares, $100 each), of which the $25,000,000 common is owned by the Grand Trunk Ry.

BONDS.—The Canadian Government agreed to guarantee 3% 1st mtge. bonds for an amount up to 75% of the cost of construction of the Western division, such amount (*a*) in the case of the Prairie Section not to exceed $13,000 per mile, or £3,210,000 in all; and (*b*) three-quarters of total cost per mile from the mountains to Pacific Coast, called Mountain Section. Total issue, £14,000,000; Royal Trust Co., Canada, trustee. V. 80, p. 996, 1234, 1363; V. 81, p. 507, 613; V. 89, p. 224, 286; V. 91, p. 214, 276. Although the mortgage to secure the 3% bonds guaranteed by the Government ranks before the mtges. securing A and B bonds guaranteed by the Grand Trunk Ry. of Canada, yet an agreement schedule to an Act of 1904 provides in effect that in the event of default by the company for 5 years in payment of the int. on the 3% bonds, the remedy of the Government shall be to put in a manager with the concurrence of the company to operate the Western Division and to collect and distribute net earnings of each particular division *pari passu* between the holders of the bonds guar. by the Govt. and the holders of the bonds guar. by the Grand Trunk Ry. Co. in the proportion of 75% of such earnings to the holders of the Govt bonds and 25 to the holders of the bonds of this division guar. by the Grand Trunk Ry. Co.

In May 1909 the Dominion Government agreed to loan not exceeding $10,000,000, repayable in 10 years or at any time on 6 months' notice, interest thereon to be 4%, payable semi-annually, secured by the company's bonds to the same amount, maturing 1919, guar. prin. and int. by the Grand Trunk, under a mtge. on the Prairie Section, subject to existing prior liens. V. 88, p. 822, 1194, 1061, 1253; V. 90, p. 1165.

Lake Superior branch bonds, total issue limited to £1,550,000, are secured by a 1st mtge. on all the 188-mile Lake Superior Div. and are guaranteed, prin. and int., by the Grand Trunk Ry. Co. (V. 80, p. 996.)

In 1909 Acts were passed by the provinces of Saskatchewan and Alberta, authorizing the respective provinces to guarantee, prin. and int., at the rate of $13,000 per mile, first mtge. bonds to be issued by the *Grand Trunk Pacific Branch Lines Co.* for the construction of new lines, viz., 670 miles in Saskatchewan and 491 in Alberta, to be worked under agreement by the Grand Trunk Pacific Ry. Power is given to issue additional bonds up to $2,000 per mile, making $15,000 per mile. V. 90, p. 1044, 1165; V. 88. 1437.

DEBENTURE STOCK.—In 1906 $25,000,000 debenture stock was authorized, of which $15,000,000 (£3,000,000), int. guar. by the Gr. Tr. Ry. under certain conditions (see V. 84, p. 570), to be issued as perpetual deb. stock; of this, £3,000,000 was sold in 1907 to 1909 and £1,000,000 was offered in Jan. 1910 at £92½. V. 88, p. 624; V. 90, p. 303.

ORGANIZATION.—Incorporated in Texas on Aug. 10 1911 and has succeeded the Int. & Great Nor. *RR.* foreclosed June 13 1911. The 3d M. bondholders' committee bought up practically all of the 2d M. bonds at par and int. and recapitalization is pending per plan in V. 92, p. 1310, subject to valuation to be fixed by Texas RR. Commission. V. 93, p. 1105. The I. & G. N. Holding Corporation was incorporated in Virginia in Nov. 1911 with $5,500,000 capital stock to be used in the reorganization of the railroad company in such a way as to preserve the equity of the 3d M. bondholders in case the Texas RR. Comm. do not allow a greater valuation than $30,365,000 for the I. & G. N. See V. 93, p. 1386.

Holders of $2,961,000 3d M. bonds will receive common stock to an amount not exceeding the par of the bonds and overdue interest thereon. Bonds deposited to May 9 1911 to come ahead of those thereafter deposited in distribution—see STOCK below. Depositary, Equitable Tr. Co., N. Y.

Annual fixed charges of new company will aggregate $1,349,840 and after payment or redemption of notes $1,407,340.

The cash required ($15,340,000) has been raised as follows: (*a*) by the sale to bankers of $11,000,000 3-year 5% notes redeemable at 101% and int. on 30 days' notice, secured by deposit of $13,750,000 1st ref. M. bonds, of which $12,150,000 has been deposited by the new company and $1,600,000 by the syndicate; and (*b*) by the sale to a syndicate of $1,600,000 1st ref. M. bonds, $3,400,000 pref. stock and $2,500,000 common stock. In case the valuation fixed by the Texas RR. Comm. calls for an amount of new securities less than the amount called for by the plan, the reduction will affect first the amount of new common stock to be given for the old 3d M. deposited after May 9 1911 (V. 92, p. 1310).

STOCK.—New common stock, $6,000,000 (subject to reduction as above stated). The $5,000,000 5% non-cum. pref. stock will be entitled to share at the same rate as the common in all dividends in excess of 5% upon the common, and to be preferred as to face value and accrued dividends in case of liquidation; $1,600,000 is to be reserved for exchange of a like amount of the initial issue of 1st ref. M. bonds which are deposited under the 3-year 5% notes. Upon the liquidation of the notes from time to time the first ref. bonds contributed by the syndicate are to be proportionately surrendered to the new company upon the issue by it to the syndicate of a like par amount of its preferred stock.

BONDS.—Of the new 1st refunding M. 30-year 5s ($50,000,000 auth.), $12,150,000 have been pledged as security for the 3-year 5% notes and $1,600,000 sold for cash to the syndicate and by it deposited as further security for said notes (see above). $11,489,000 are reserved to refund underlying bonds and $24,761,000 are reserved, under restrictions, for additional equipment, additions, extensions and improvements. An agreement has been made to sell a maximum amount of $1,000,000 of the bonds yearly for 3 years as required for improvements, extensions and equipment. Compare V. 94, p. 350. The secured notes through their collateral cover entire property at (including underlying bonds) about $20,500 per mile. See offering, V. 94, p. 350.

In March 1910 the Lake Shore & Michigan Southern acquired the greater part of the Toledo & Ohio Central stock and all the stock and bonds of the Zanesville & Western and jointly with the Chesapeake & Ohio, a majority of the Kanawha & Michigan stock. V. 90, p. 771.

In 1912 contemplated sale to N. Y. N. H. & H. of remaining interest in majority holdings of Rutland RR. pref. V. 93, p. 1600; V. 92, p. 527.

The Pub. Serv. Comm. in Feb. 1912 had under advisement the company's proposition to purchase from the N. Y. N. H. & H. RR. its holdings of $29,160,000 com. stock and $2,200 pref. stock in the N. Y. Ont. & Western —which see (V. 93, p. 1600). The purchase of the stock of the Rome Wat. & Ogdensb. (leased) is also proposed. V. 94, p. 279.

In 1910 a 99-year traffic agreement was made with Western Maryland.

Proposed Consolidation.—In Dec. 1911 the company, as a preliminary to the unifying of the system, probably in the first instance by consolidation with the Lake Shore and other companies, and later possibly with the Mich. Cent., asked the holders of N. Y. Central coll. trust 3½s secured by Lake Shore and Mich. Cent. stocks to consent (1) to a consolidation or successive consolidations of the N. Y. Central or its successors with any other railroad company or companies now or hereafter in the system; and (2) to the said bonds being given a direct lien on the N. Y. Central System next in rank to the existing N. Y. Central gen. mtge. dated June 1 1897 whenever the N. Y. Central is consolidated with one or more other roads. V. 93, p. 1788.

In Dec. 1911 the holders of the $10,000,000 stock of the N. Y. & Harlem RR. (leased—see that co.) were offered $175 a share in cash for each of their $50 shares and also the further right to subscribe with the proceeds at 92 and int. for the $35,000,000 4% 30-year debentures of 1912, issuable to finance the purchase. V. 94, p. 208.

Collateral trust 3½s of 1898 are secured by deposit of stock of the Lake Shore & Michigan Southern and Michigan Central RRs. at the rate of $100 of L. S. & M. S. stock for each $200 of bonds and $100 of Mich. Cent. stock for each $115 of bonds outstanding. As to proposition to give these bonds a direct lien, see "Proposed Consolidation" above. V. 66, p. 288, 336, 760, 811.

In Dec. 1911 application was made to issue $13,108,192 4½% 50-year debenture bonds to purchase control of N. Y. O. & W. Ry. V. 93, p. 1600.

The 30-year 4% debentures which to the extent of $35,000,000 have been authorized to be issued in exchange for N. Y. & Harlem shares ($10,000,000) under the offer to the holders of the latter, are part of an issue limited to $50,000,000. They are to be secured under any future mortgage made by the N. Y. Central or successor company (other than to refund existing mortgages or to secure the Lake Shore & Michigan Central collateral bonds) ratably with the bonds issued under such mortgage and may be exchanged within 12 years from the date of the latter from an equal amount of bonds issued thereunder bearing the same rate of interest and maturing not less than 50 years from their date. The Pub. Serv. Comm. in Dec. 1911 gave its assent to the issue of not over $30,000,000 3-year 4½% notes, if desired, in place of an equal amount of the aforesaid $35,000,000 debentures. V. 94, p. 208; V. 93, p. 1788, 1600.

In 1904 $50,000,000 4% debentures were authorized, of which $30,000,000 were sold in 1904 and $13,000,000 in 1908. On Jan. 13 1910 the company was authorized to issue $5,000,000 4% debenture bonds of 1934 in payment for $5,000,000 Geneva Corning & Southern 1st pref. stock. V. 90, p. 168; V. 92, p. 462. They are to be secured by any new mortgages, but existing mtges. may be extended. V. 78, p. 1907, 1962, 2384; V. 79, p. 1335, 2148; V. 86, p. 1043, 1101, 1467; V. 78, p. 415, 614; V. 92, p. 726.

In 1909 made a new mtge. on the Geneva Corning & Southern to secure an authorized issue of not exceeding $10,000,000 bonds bearing 4% interest, to retire outstanding bonds and for extensions and improvements, of which $600,000 authorized to be issued in March 1911; not yet issued, Feb. 1912. V. 88, p. 1128; V. 89, p. 287; V. 92, p. 462, 726. Also on the Spuyten Duyvil & Port Morris $20,000,000, of which $2,500,000 3½s have been issued, mostly to refund indebtedness to N. Y. Cent. V. 89, p. 105, 287.

In March 1911 $30,000,000 3-year 4½% gold notes were sold for terminal and other improvements. V. 92, p. 462, 660, 726, 1109.

As to equip. trusts of 1909, 1910 and 1912, see "N. Y. Cent. Lines" above.

GUARANTIES.—The company guarantees the securities of its leased lines to a considerable aggregate—see separate statement for each company in the table of mileage preceding. It also guarantees Western Transit Co. 3½s for $1,000,000 due Feb. 1923 and $2,500,000 Clearfield Bituminous Coal Corporation 4½s. V. 93, p. 45, 164.

GENERAL FINANCES.—The west side N. Y. City improvement proposed in 1911 is estimated to cost $40,000,000 or more. V. 93, p. 871.

In April 1911 arranged to give the N. Y. N. H. & Hartford through traffic service by way of the Boston & Albany for ten years from July 1 1911, terminable on one year's notice by either party, the New Haven to take one-half of the net profits above the rental due the Boston & Albany under the lease. V. 92, p. 1179; V. 93, p. 105, 866.

In 1902-03 control of the Reading Co. was acquired by Balt. & Ohio and Lake Shore. V. 76, p. 101; V. 78, p. 48.

In July 1911 the Oregon Short Line (Union Pacific system) owned $17,857,125 N. Y. Central stock V. 84, p. 52, 571; V. 89, p. 411.

In July 1910 an initial dividend of 1½% was paid on the New York State Rys. common stock and 1½% on Mohawk Valley Co. stock. V. 90, p. 1296.

Y., on the N. Y. N. H. & H. RR. (V. 90, p. 503.) Incorporated in New York April 21 1892.

Cost of construction estimated to be about $20,000,000 (of which about $5,000,000 had been expended June 30 1911), to be provided by a bond issue guaranteed jointly by Penn. and N. Y. N. H. & H. V. 93, p. 867. —(V. 90, p. 503.)

The stockholders are also offered the right as a separate proposition to subscribe with the proceeds for new N. Y. Central 30-year 4% debentures at 92. V. 94, p. 208; V. 93, p. 1788, 1600.

The steam road (since partly electrified) was leased April 1 1873 for 401 years to the N. Y. Cent. & Hudson R. RR. Co. for interest on the bonds and dividends of 10% per annum, payable J. & J. on the entire capital stock of N. Y. & Harlem RR. Co.

BONDS.—The first consolidated mtge. of 1896 is limited to $62,500,000, the balance unissued being reserved to retire the underlying bonds. V. 73, p. 502; V. 74, p. 151; V. 75, p. 505; V. 77, p. 1785; V. 78, p. 229. They are a 1st mtge. on about 898 miles of railroad; upon important terminals at Norfolk and Lamberts Point; upon the Ohio River Bridge and the Roanoke Machine Works; also a consol. mtge. upon 776 miles subject to the undisturbed liens. They also cover equipment. See abstract, V. 64, p. 376; V. 72, p. 137, 438, 532, 723, 1080; V. 75, p. 505; V. 79, p. 213; V. 81, p. 212.

The N. & W.-Pocahontas joint bonds are secured by about 295,000 acres of coal lands owned and held by the Pocahontas Coal & Coke Co., whose stock is owned, of which about 50,000 acres have been leased to companies whose stock is all owned by the U. S. Steel Corp. and 39,797 to other concerns, the royalties under such leases alone being shortly expected to be sufficient to almost meet the fixed charges. They are subject to call at 105 since 1906 for a sinking fund of 2½ cents per ton mined. V. 73, p. 845, 902; V. 74, p. 41, 380, 1197; V. 75, p. 502. These bonds are the joint and several obligations of the Railway Co. and of the Coal & Coke Co., but as between the two companies the debt is to be paid by the latter company.

Divisional 1st lien and gen. mtge. 4s of 1904 ($35,000,000) authorized for future capital requirements are a 1st lien on extensions and branches not covered by the 1st consol. mtge. aggregating 220 miles, and upon such extensions and branches as may be acquired from the proceeds of the new bonds and also a lien subject thereto upon the properties covered thereby. V. 78, p. 1549; V. 79, p. 501, 628, 973, 1642, 1704, 2148; V. 80, p. 1175; V. 82, p. 510; V. 83, p. 1471; V. 88, p. 231, 453.

The stockholders on Oct. 13 1910 authorized an issue of $50,000,000 convertible bonds. V. 91, p. 463. See below.

In 1902 were issued $50,000,000 10-year 3½% gold bonds, dated Nov. 1 1902, of which $39,777,000 had been converted in Feb. 1912 into stock at $70 per share and balance is convertible at holders' option at $70 per share at any time; they may be called for payment at 102½ on any int. day, but if called converted on basis stated. See V. 74, p. 577; V. 87, p. 1421 V. 90, p. 447.

In 1905 stockholders subscribed at par for part of $100,000,000 of 3½% gold bonds, the balance being taken by a syndicate. The bonds are (since Dec. 1 1905) convertible at option of holder at any time into stock at $75 per $50 share unless previously called for redemption on Dec. 1 1910, or at any subsequent interest period on 90 days' notice, at par and interest; but when so called they may be converted up to 30 days prior to the date named in said notice for redemption. A part of the proceeds was used to retire the $27,480,000 6% bonds maturing June and July 1905; balance for improvements. See V. 80, p. 1112, 1236, 1913; V. 81, p. 1437; V. 90, p. 447.

GENERAL FINANCES.—In 1901 obtained control of the Pennsylvania and Cambria Steel cos. See "Industrial cos." and V.72, p.1280; V.82, p.805

On November 27 1910 the company opened its passenger electric tunnel railroad from Harrison, N. Service from N. Y. station to Long Island City was begun Sept. 10 1910. V. 91, p. 397, 946, 1161; V. 92, p. 663.

The tunnel will afford entrance into New York City for the Pennsylvania Railroad and the Long Island Railroad, permitting through trains by rail direct from the South and West to all points in New England via the bridge from Mott Haven to Long Island, which is to be built by the N. Y. Connecting RR.; see V. 86, p. 608; V. 87, p. 813, 1238; V. 88, p. 631; V. 89, p. 666, 919; V. 90, p. 635. V. 93, p. 867.

Pres. E. E. Tait of P. & S. RR. in June 1911 wrote: "Even on the basis of present partial operations, the gross earnings of the combined railroads for the year ending June 30 1911 will be about $6,000 per mile, which, under normal operating conditions, together with the revenues from the present coal development, would be ample for the payment of all fixed charges of the P. & S. RR. Co. Net earnings for the current fiscal year ending June 30 1911 practically cover the interest on the present investment on that part of the P. & S. RR. now in operation. For the year ended June 30 1913, the net earnings of the P. & S. RR. should be at least $492,000, or well in excess of the present charges, incl. interest on these ($3,250,000) notes."

The St. Louis Brownsville & Mexico (which see) was purchased early in 1910 and consolidated with the Colorado Southern N. Orl.& Pacific, etc., into the New Orl Tex & Mexico Ry. lines extending from New Orleans, La., to Brownsville, Tex., with branches, in all 977 miles, including 183 miles trackage, affording via National Rys. of Mexico a through line to the City of Mexico. See BONDS below. V. 90, p. 699; V. 91, p. 590.

The St Louis & San Francisco and Louisville & Nashville jointly own a controlling interest in the New Orleans Mobile & Chicago RR., which see.

The Memphis Arkansas & Louisiana Ry. was incorporated in Louisiana in Dec. 1911 with $25,000,000 authorized stock, to build a line from Port Barre, La., to Memphis, about 375 miles. V. 93, p. 1601.

In 1911 arranged lease of Louisiana So. Ry., New Orl. to Belair, &c., 45 miles. V. 93, p. 46.

ORGANIZATION.—Organized June 30 1896 to succeed to the property and franchises of the *Railway* co. sold in foreclosure and reor. per plan in V. 62, p. 829 and 1140—see also p. 742. The system then was about 1,500 m.

In Dec. 1909 the Yoakum-Hawley interests purchased from the Rock Island Co. the $28,940,300 of the $29,000,000 com. stock acquired in 1903.

In 1902 Birmingham Belt RR. (V. 75 p. 1148) was purchased; also St. Louis S. F. & New Orl. Ry., V. 74, p. 1197; V 75 p 343; V. 85, p. 531.

The New Orleans Terminal Company has issued 4% gold bonds (present outstanding amount $14,000,000), guaranteed jointly by St. L. & S. F. and the Southern Ry. V. 77, p. 38; V. 76, p. 1144. Rock Island-'Frisco Term. Ry. (St. Louis), see V. 82, p. 930; V. 84, p. 749, and that Co.

Owns all stock of Ft. Worth & Rio Grande Ry. V. 64, p. 1224.

STOCK.—Company reserves right at any time to redeem either or both classes of pref. stock at par. "Supp't" April 1897, page 6.V. 90, p. 699.

DIVIDENDS.— '97. '98. '99. '00. '01. '02 to '05. '06 to '11. 1912.

STOCK TRUST CERTIFICATES.—Kansas City Ft. Scott & Memphis Ry., Kansas City to Memphis, Tenn., with branches, 914 m., was acquired in 1901; its entire stock is owned and road leased for int. on bonds and 4% on pref. stock trust certfs. (see above table), the 4% ref. bonds being guar., p. & l.; see K. C. Ft. S. & M. in this issue and V. 72, p. 438, 532, 581, 1238.

In July 1905 all of the $7,217,800 common and $6,211,700 of the $8,830,700 preferred Chicago & Eastern Illinois Railroad stock then outstanding had been acquired, the St. Louis & San Francisco giving in exchange its stock trust certificates at the rate of $100 for each $100 share, upon which 10% and 6% dividends, respectively, are paid. In 1905 the holders of a majority of the com. stk. trust certfs., preferring to have a security redeemable at par instead of at the rate of $250, exchanged their certfs. for a new form in the denomination of $1,000 each, representing the deposit of four shares of stock. Int. on these latter certfs. is payable at the rate of 4% per annum, so that both the income and prin. are unchanged—only form of security being changed. (See form, V. 80, p. 1857.) In Oct. 1911 authority was given to list $4,000,000 additional pref. stock voting trust certfs. up to a total of $10,211,700; total listed Feb. 1912, $6,479,600. See Chicago & Eastern Illinois on a preceding page.

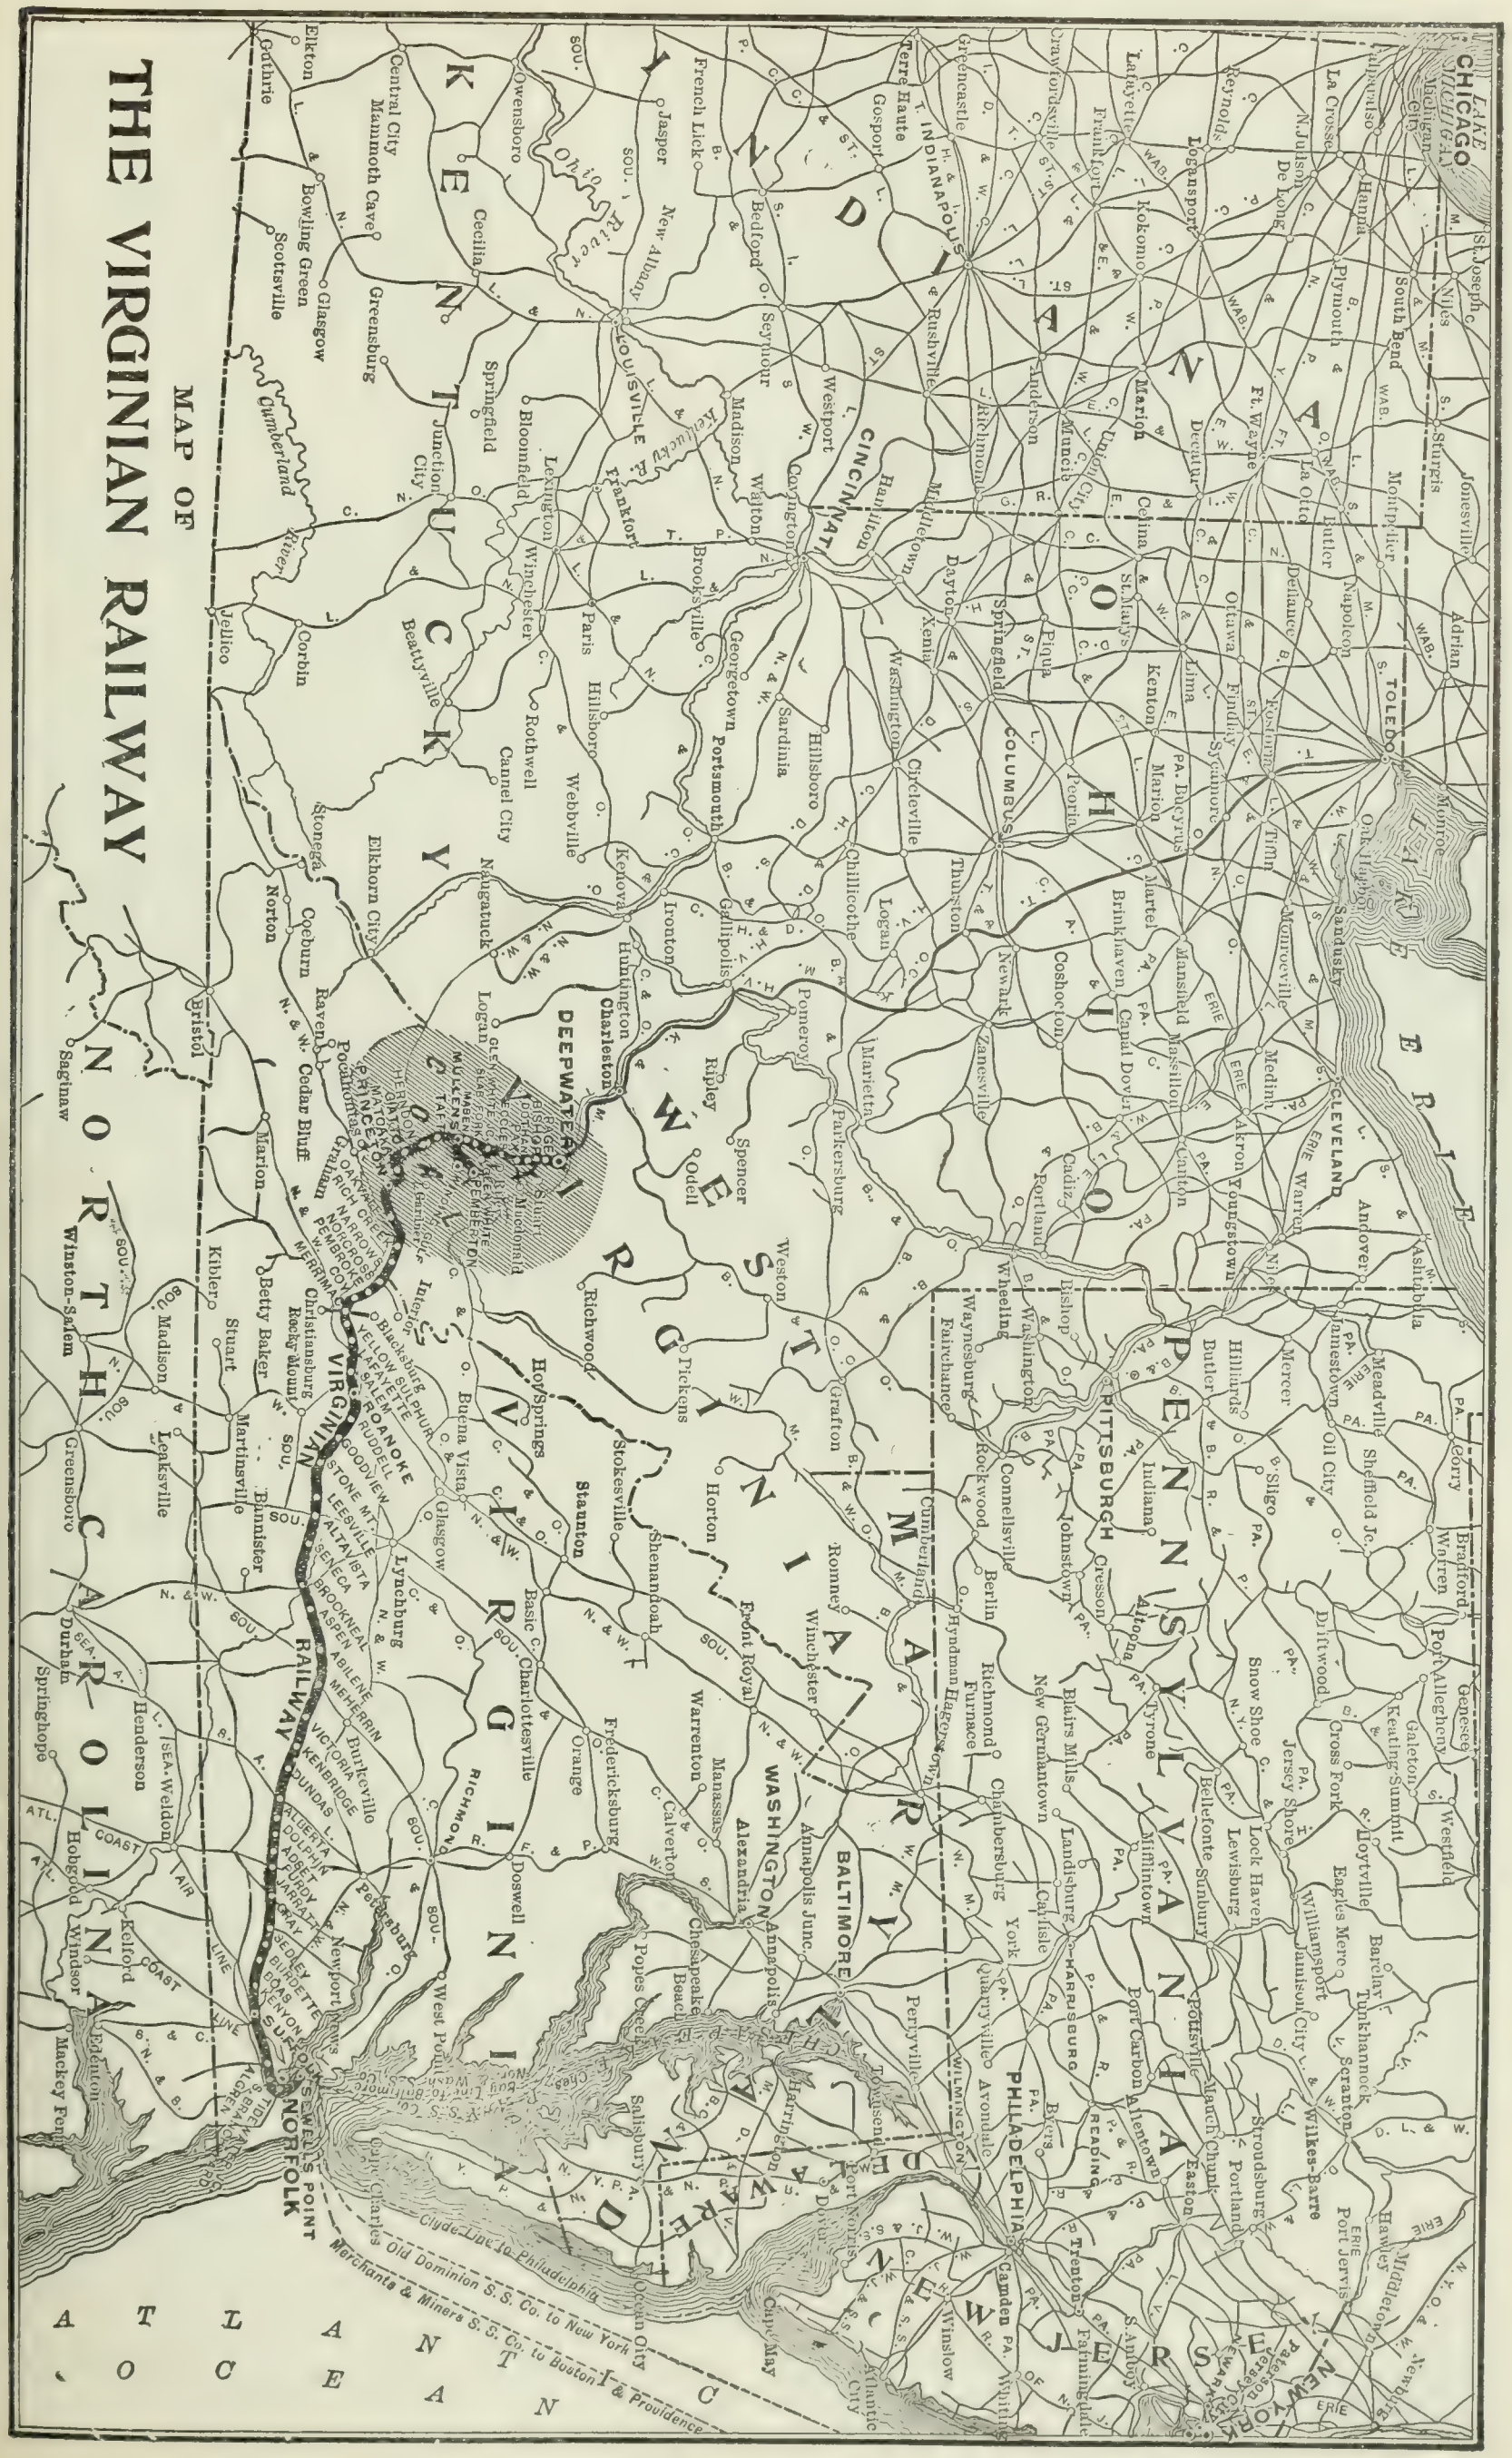
VIRGINIAN RAILWAY.—(*See Map*).—The main line of the road extends from Deepwater, on the Kanawha River, in West Virginia, to Sewell's Point, on Hampton Roads, near Norfolk, Va., a distance of 442 miles. Winding Gulf branch, Mullins, W. Va., to Pemberton, 24 miles; other branches, 4 m.; leases Virginian Term. Ry., 1.75 m.; trackage, 3 m.; total, 475 miles. See V. 88, p. 102. Branches, total about 45 miles, are proposed. Main line fully opened July 1 1909. See V. 84, p. 627; V. 78, p. 1962; V. 81, p. 1551; V. 83, p. 436; V. 84, p. 1249; V. 88, p. 102.



Built on modern lines and in the most substantial manner. The main traffic is coal and lumber, but the country is described as rich in farm land, which should afford a diversified traffic, garden and farm products, &c. The road taps the Pocahontas and New River coal fields, and forms "the shortest possible route to tidewater over the lowest grades." From Princeton, the main coal-gathering yard, 350 miles west of Sewell's Point, the eastbound grade does not exceed 0.2 of 1%, or 10½ ft. per mile, except for a 9-mile section over the Allegheny Mountains, where the maximum grade is 0.6 of 1%, or 32 ft. per mile; on this section a pusher will be used. One locomotive will haul 80 loaded 50-ton coal cars, or 4,000 tons of coal per train.

STOCK.—Auth., $36,000,000 common; issued, $34,245,000; par, $100. Pref. stock, 5% cum. $29,000,000 was authorized Jan. 27 1912, redeemable as an entirety at any time after 3 years from date of issue by vote of majority in amount of all athe outstanding stock on payment of $105 per share, plus any accumulated dividends. V. 94, p. 209, 353.

FINANCES.—The only securities held by the public, aside from equipment certificates, are $17,000,000 Tidewater Co. notes (see below), and these are secured by pledge not only of all bonds issued on the main line, but of $10,000,000 of other income-producing securities and by the guaranty of Henry H. Rogers, who, with associates, financed the enterprise.

BONDS.—The first 5s are issuable as follows: $33,500,000 for the construction of the line from Deepwater to Sewell's Point, 442 m., single track, with passing tracks about one mile in length on an average of each six miles. Further bonds may be issued for new construction, under restrictions provided in the mortgage; about $1,250,000 have been issued for Winding Gulf branch. V. 84, p. 1368; V. 88, p. 626. Authorized Dec. 1911, $34,800,000; issued, $34,195,000.

The Virginian Terminal Ry. 5s cover the Sewell's Point terminals, which comprise 600 acres of land, with a water front of over 3,000 feet; of the auth. issue of $10,000,000, guar. prin. & int. by the Virginian Ry., $3,000,000 will be issued for the construction now contracted for, the remaining $7,000,000 being reserved for future additions. V. 84, p. 1184. The $499,000 stock of the Va. Term. Ry. Co. is owned by the Virginian Ry.
